

Certificate of State of Charge

Lithium Iron Phosphate (LiFePO4) Batteries - Prepared for Transport

Certificate No.	KH-20261006-0001
Date Issued	2026-10-06 18:32

Customer	Acme Mobile Power	Serial Number	KH-LFP-240001
PO Number	PO-55821	Model	12.8V 100Ah LiFePO4
Lot / Batch	LOT-2610-A	Chemistry / Config	LiFePO4, 4S, 12.8 V nominal

We certify that each lithium iron phosphate (LiFePO4) battery listed on this certificate was discharged under controlled conditions and verified to be at a state of charge (SOC) not exceeding 30% of its rated capacity at the time of test. SOC was determined by coulomb counting (amp-hours removed from a fully charged state) and confirmed by a rested open-circuit voltage check.

Test Results

Rated Capacity	100.0 Ah	Result	PASS
Starting SOC (assumed)	100 %	Final SOC	30.0 %
Target SOC	≤ 30 %	Rested OCV	13.01 V
Capacity Removed	70.01 Ah	Energy Removed	890.7 Wh
Starting Voltage	13.64 V	Max Temperature	40.0 °C
Discharge Start	2026-10-06 18:32	Discharge End	2026-10-06 18:32

Discharge Record

Method & Equipment

Constant-current discharge at 25.0 A on bench channel CH1. Amp-hours integrated from measured current; SOC = start SOC - Ah removed / rated Ah. Load switched off at target and battery rested before open-circuit voltage was recorded. Instrument: SIMULATED,LFP-LOAD,0,1.0.
