

Certificate of State of Charge

Lithium Iron Phosphate (LiFePO4) Batteries - Prepared for Transport

Certificate No.	KH-20261006-0007
Date Issued	2026-10-06 18:34

Customer	Acme Mobile Power	Quantity Certified	6
PO Number	PO-55821	Model(s)	12.8V 100Ah LiFePO4
Lot / Batch	LOT-2610-A	Test Dates	2026-10-06 to 2026-10-06

We certify that each lithium iron phosphate (LiFePO4) battery listed on this certificate was discharged under controlled conditions and verified to be at a state of charge (SOC) not exceeding 30% of its rated capacity at the time of test. SOC was determined by coulomb counting (amp-hours removed from a fully charged state) and confirmed by a rested open-circuit voltage check.

Certified Units

#	Serial Number	Model	Rated Ah	Start V	Ah Removed	Final SOC %	Rested OCV V	Tested	Result
1	KH-LFP-240001	12.8V 100Ah LiFePO4	100	13.64	70.01	30.0	13.01	2026-10-06 18:32	PASS
2	KH-LFP-240002	12.8V 100Ah LiFePO4	100	13.76	70.02	30.0	12.98	2026-10-06 18:32	PASS
3	KH-LFP-240003	12.8V 100Ah LiFePO4	100	13.67	70.01	30.0	13.01	2026-10-06 18:32	PASS
4	KH-LFP-240004	12.8V 100Ah LiFePO4	100	13.60	70.01	30.0	12.99	2026-10-06 18:32	PASS
5	KH-LFP-240005	12.8V 100Ah LiFePO4	100	13.64	70.02	30.0	12.99	2026-10-06 18:32	PASS
6	KH-LFP-240006	12.8V 100Ah LiFePO4	100	13.61	70.01	30.0	13.01	2026-10-06 18:32	PASS

Method

Each battery was discharged at constant current from a fully charged state on a programmable electronic load. Amp-hours removed were integrated from measured current; the load was switched off when the calculated SOC reached the target, and the battery was rested before open-circuit voltage was recorded. Individual discharge records are retained and available on request.
